Introductory Computer Course Teaching Website User Manual

This manual is applicable to the teaching website of computer introduction course. Screenshots are for demonstration purposes only, and may vary depending on the content of the database, and are for reference only.

The first part of the basic operation of the website

Enter the website address, it will be automatically redirected to the home page (siteindex page). On the home page, you can see the title of the website, welcome words, static pictures on the home page, and several sections of website dynamic information. The dynamic information of the website is determined by the real-time information in the database connected to the website, which shows the number of courses available on this website and the number of lecturers entered into the system.

第一课信息技术 (本网站作者, 林诗雨)

第二课 互联网 (讲师, 李明)

第三课应用程序(教授,王嘉琦)

第四课编程语言(副教授,张三)

Open the "All Courses" link in the left navigation bar to jump to the course list page. The course list contains records of all courses held in the database.

Open any course record link to enter the course details page. This page contains the basic information and detailed content of the course, including title, lecturer, theme, introduction, and graphic content. Instructor links navigate to the instructor's personal page (described later).

Click on the "All Lecturers" link on the left to navigate to the Lecturer List page, which lists the summary information of all registered lecturers in the database.

Open any lecturer link, you can enter the lecturer details page, including the lecturer's avatar, name, title, college and profile information.

Click the "Register" link on the left to enter the page for registering a user account. After filling in the user name and password that meet the requirements, the system will create an account for you and log in for you automatically.

When the input username/password does not meet the requirements, the system will prompt to provide it again.

Click the "Login" link in the left navigation bar to log in to an existing account.

When the provided user credentials are incorrect, an error message will be displayed and a refill will be required.

After successful login, you will be navigated back to the page you opened last time, and the left navigation bar will add "My Courses" and "Logout" links. "My Courses" is an open function after login.

Clicking on "My Courses" will display the record of the course marked as the current user's ongoing course in the system, and display the learning status. Among them, "learned" will be marked in green, "learning" will be marked in brown, and "not learned" will be marked in red.

Opening any link from the "My Courses" page will open the "Spot Details Page". This page contains all the content of the previous course detail page. In addition, the current

learning status of the course will be displayed, and a link will be provided for the user to change the current learning status.

After opening the link, you can select the learning status of the current course from a drop-down list.

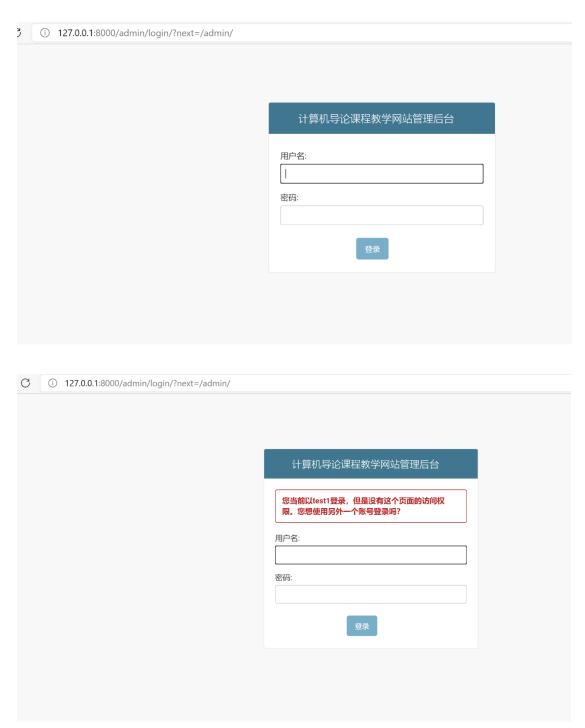

Successfully changed the current course to "not studied" status.

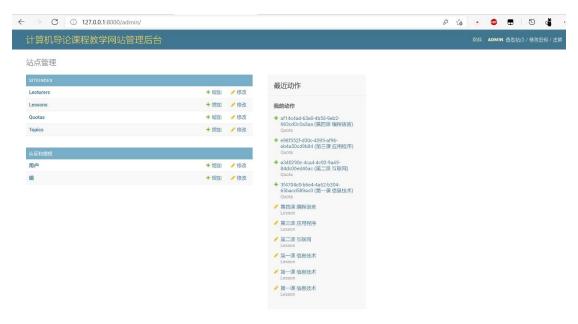

After the operation of the current user is completed, click the "Logout" link to log out the current user and return to the unlogged mode.

The second part website management page operation

Open the website URL/admin URL, you can enter the management background of the website and manage the website data.

If the currently logged in user does not have administrator privileges, it will be prompted to log in to the administrator account.

After logging in, enter the management background. Here you can edit course records, edit instructor information, add/modify/delete courses and assign them to different users, edit topics, and manage user accounts.

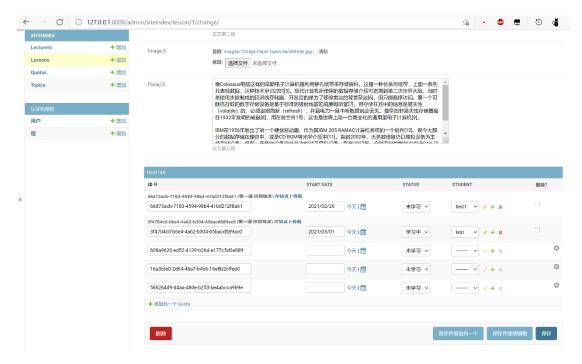

list of lecturers

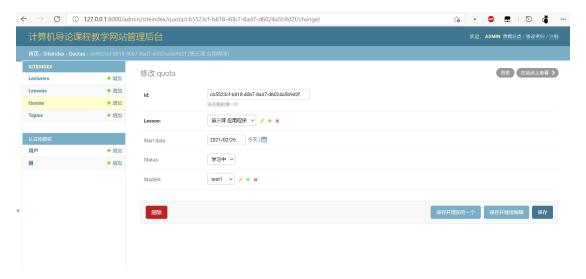

Lecturer's detail edit page

The edit page for the course. You can fill in the course content here. Currently, each course is limited to contain up to three paragraphs of text and three pictures. If more are needed, it can be achieved by simply changing the model definition.

In the end, for the convenience of adding the number of courses, an inline editing module is inserted here, which can easily add the number of places for the current course.

You can also modify a specific quota in the quota editing view. Here you can select courses for different users, first select a specific course quota (if you have not created it, you can create it first), and then select a specific user in the "student" drop-down list to add the record of this course for him.

Users of the website can be managed in the user management interface. Accounts registered with the link on the homepage of the website do not have staff permissions. Here you can see detailed information about the user including permissions.

Finally, you can click "View Site" on the home page of the management background to return to the home page of the website.
